Third Party Risk Analyst - London, 12 Months FTC

Pay.UK maintains and develops the UK retail payment systems and standards that are core to the economy. From Bacs to Faster Payments and cheques, we act as the single operator for UK retail payments, working in the public interest to ensure safe, open, innovative and resilient systems.

Pay.UK maintains and develops the UK retail payment systems and standards that keep the economy moving, processing over 11 billion transactions worth more than £10 trillion each year. In this role, you will build practical third party risk experience by working end to end on supplier assurance across systems that millions of people and businesses rely on every day. We are seeking a Third Party Risk Analyst to join our Procurement team on a 12 month fixed term basis, reporting to the Senior Third Party Risk Manager and supporting effective risk oversight across critical supplier relationships.

Accountabilities

The role incorporates the following key responsibilities.

- Issue, manage and assess Third Party Assurance Questionnaires across key risk domains including cyber security, data protection, operational resilience and business continuity.
- Evaluate supplier responses and evidence to assess control design and effectiveness, documenting findings and residual risk.
- Produce clear Third Party Assurance Reports, including issues, remediation actions and timelines.
- Act as Pay.UK's operational point of contact with suppliers during assurance

What you need to know about the London Tech Scene

London isn't just a hub for established businesses; it's also a nursery for innovation. Boasting one of the most recognized fintech ecosystems in Europe, attracting billions in investments each year, London's success has made it a go-to destination for startups looking to make their mark. Top U.K. companies like Hoptin, Moneybox and Marshmallow have already made the city their base — yet fintech is just the beginning. From healthtech to renewable energy to cybersecurity and beyond, the city's startups are breaking new ground across a range of industries.
